<p>Name: Erika and Kaitlin Foldyna and Lloyd            Affiliation: Foothills School of Arts and Sciences            Address1: 618 S. 8th St.            Address2:            City, State Zip: Boise, ID 83702            Telephone: 2083319260            Date Entered: {ts '2000-04-19 14:57:19'}            Comment:            Dear Thomas L. Wichmann April 19, 2000            69-1 III.D.3(i)            [We have a very good idea for how we can prevent nuclear waste from leaking into the Snake River. We do not think you should use the separation technique because it costs too much money and is unproven.] Here is our idea: [Maybe you could turn it into glass and keep it in a steel case as far under the Earth as possible.] We think this is important because we have heard of what has happened in the past (Hiroshima and Chernobyl) and do not want history to repeat itself in that form. We are concerned for our health and the health of others. [If you like our idea, please write back.]            69-2 VIII.D.2.4(i)            Sincerely,            Kaitlin Lloyd (age 11) and Erika Foldyna (age 9)</p>

<p>Name: Briana and Katherine Schueren and Reardon            Affiliation: Foothills School of Arts and Sciences            Address1: 618 S. 8th St.            Address2:            City, State Zip: Boise, ID 83702            Telephone: 208.331.9260            Date Entered: {ts '2000-04-19 14:47:58'}            Comment:            Dear Mr. Whichmann, 70-1 III.A.(i)            [It is come to our attention that the nuclear waste you are producing and storing has recently, and still is, leaking into the Snake River aquifer.] That concerns my partner Briana and I Katherine.            70-2 VIII.D.4(i)            We live in Boise, Idaho, but we consume many foods, and drinking water which was grown and produced in Eastern, Idaho. [We are concerned that waste and other by-products are leaking into the food and water supply. We're writing to you because we fear the risk of cancer and other sicknesses to the people of Idaho.] [We suggest you find a much more stable and secure way to store your waste.]            70-3 III.E.(3)            Thank You!            Sincerely,            Katherine Reardon and Briana Schueren            Foothills School of Arts and Sciences            [P.S. Please reply!] 70-4 IX.C.(i)</p>
